

**AMENDMENTS TO THE ABSTRACT:**

Please amend the original abstract as follows:

A micro-storage device. The device is capable of being conjoined with a personal adornment is disclosed, which. The device has a substrate having a ~~has a~~ connector connecting head formed by an extension ~~[[to]]~~ from a circuit board ~~and accordingly forms an all-in-one substrate. Electronics part. Electronic components are packaged positioned~~ on the substrate by a chip package technique to house the ~~electronics~~ electronic components and corresponding circuitry on the substrate ~~[[by]]~~ and a metal case [[to]] is provided to house and protect the substrate ~~offer a product protection function.~~ The inventive micro-storage device can conjoin with a personal adornment for portability.
